Re: 2017-2018 Catalog Errata

Please note the following changes to the curriculum for the Master of Science in Clinical Laboratory Management:

1. The requirement for CHS 620 Health Care in America (2 SH) was replaced by HSC 634 Issues and Trends in Healthcare (3 SH).
2. HSC 632 Leadership Theory was removed as a requirement of the program in a curricular change effective Fall 2018.
3. The total credit hours for the program is 43 instead of 45.

Let me know if you need more information.
