Re: Degree Audit for the MLS Class of 2019

Maribeth L Flaws

Please note the following corrections to the 2017-2018 Rush University Catalog with regards to the curriculum for students enrolled in the M.S. in Medical Laboratory Science program who graduated in Spring 2019:

1. The total number of credit hours in the program is 80 as printed, not 81 if the credit hours as printed are all added together
2. The course number for Research Methods taken in Year 1 Spring is CHS 610, not CHS 502
3. The credit hours for CHS 610 Research Methods is 2, not 3
4. The total credit hours taken by students in Year 1 Spring is 15 hours as printed, even though if the credit hours for each course as printed in the catalog were added together, the total would be 16
5. The total credit hours taken by students in Year 2 Fall is 16 hours, not 17 hours as printed because adding up the credit hours of each course taken in that term is 16 hours

Let me know if you need more information.
